

## PREPARE:

A basic emergency supply kit could include the following recommended items:

- Water; one gallon of water per person per day for at least three days for drinking and sanitation
- Food; at least a three-day supply of non-perishable food
- Battery-powered radio and extra batteries
- Flashlight and extra batteries
- First aid kit
- Garbage bags & plastic ties for personal sanitation
- Manual can opener for food
- Local maps
- Cell phone with chargers, inverter or solar charger

Once you have gathered the supplies for a basic emergency kit, you may want to consider adding the following items as destructive weather gets closer:

- Prescription medications and glasses
- Infant formula and diapers
- Pet food and extra water for your pet
- Money
- Important family documents such as copies of insurance policies, identification and bank account records placed in a waterproof, portable container
- Sleeping bag or warm blanket for each person
- Complete change of clothing including a long sleeved shirt, long pants and sturdy shoes
- Household chlorine bleach and medicine dropper when diluted (nine parts water to one part bleach) bleach can be used as a disinfectant.
- Matches in a waterproof container
- Feminine supplies and personal hygiene items
- Paper cups, plates, paper towels & plastic utensils
- Paper & pencil
- Books, games, puzzles or other activities for children.

**Stocking up now on emergency supplies can add to your family's safety and comfort during and after a disaster. Store enough supplies for at least three days, preferably seven days, in one place.**

## EMERGENCY PHONE NUMBERS

## BE INFORMED.

Learn what protective measures to take before, during and after an emergency

### WHY PREPARE?

Each year Eastern North Carolina prepares for the annual hurricane season (1 June - 30 November). Installation planners continually plan for destructive weather events and other emergencies including natural or man-made disasters and have established a Notification Process to alert, inform and instruct personnel as to the hazard and actions everyone should take to protect themselves from it.

The installation establishes and maintains Conditions of Readiness to posture the installation and personnel to prepare for and mitigate the effects of a destructive weather or emergency event.

The Commanding Officer evaluates, sets and coordinates Conditions of Readiness for the installation which apply to supported commands, associated auxiliary landing fields (ALF) and ranges.

Weather updates and employee reporting instructions will be located on the Cherry Point website, Twitter, Facebook and the Cherry Point Information Line 466-3093.

In the event of a destructive weather or other emergency, employees of the following commands should call the following numbers when seeking information or reporting instructions: FRC East employees - 464-8333, Defense Logistics Agency employees - 466-4083, Naval Health Clinic personnel - 466-1188 and MCCA employees - 466-6737.

All other personnel should use their respective command's notification protocols for updated information.

If residing on base or in Atlantic Marine Corps Communities (AMCC) housing, do not drive on the roadways until **\* ALL CLEAR** announcement has been delivered.

**\* All Clear:** The restrictions established in previous TCCs have been canceled. TCC V will be reestablished.

### WHAT ARE THE TROPICAL CYCLONE CONDITIONS (TCC)?

The following are Tropical Cyclone Conditions of Readiness used by planners to prepare and protect the installation and personnel from anticipated destructive weather. Each condition has action sets planners implement to protect personnel and installation assets.

**TCC-V:** seasonal destructive weather readiness level, i.e. Atlantic Hurricane Season (1 June - 30 November) is in progress or a specific storm occurring outside of the Atlantic Hurricane Season is forecasted to affect the area within 96 hours.

**TCC-IV:** A destructive weather system with sustained winds of 50 knots or greater is forecasted to affect the area within 72 hours.

**TCC-III:** A destructive weather system with sustained winds of 50 knots or greater is forecasted to affect the area within 48 hours.

**TCC-II:** A destructive weather system with sustained winds of 50 knots or greater is forecasted to affect the area within 24 hours.

**TCC-1:** A destructive weather system with sustained winds of 50 knots or greater is forecasted to affect the area within 12 hours.

**TCC-1C (CAUTION):** A destructive weather system with sustained winds of 50 knots or greater is forecasted to affect the area within 6 hours.

**TCC-1E (EMERGENCY):** The area is currently experiencing a specific destructive weather system with sustained winds of 50 knots or greater.

**TCC-1R (RECOVERY):** The destructive weather system has passed the area, but safety and storm hazards remain. All orders, restrictions and guidance established in previous TCCs remain in effect.

## MAKE A PLAN.

Prepare, plan and stay informed for Emergencies.

### WHAT IF I NEED TO SHELTER?

In the event that your home becomes unsafe during severe weather, you may need to evacuate to an emergency shelter. Evacuation should be part of your family emergency plan.

Emergency shelters are designed to provide protection for individuals who are displaced due to destructive weather, whose homes may not withstand the impending destructive weather or personnel in a transitory status who cannot be billeted elsewhere aboard the air station. Depending on the nature of the destructive weather, use of shelters by Marines and families aboard the air station may become mandatory.

Emergency shelters provide facilities to accommodate military personnel, dependents, civil service and non-appropriated fund employees with emergency food, water, sanitation, medical and religious services for an extended period of time. Unless ordered to evacuate, personnel billeted in bachelor quarters are to remain in assigned quarters.

The air station has two shelters available to residents of the installation.

#### MARINE DOME \* PET FRIENDLY \*

Building 287, Recreation Drive

\* Domestic Dogs and Cat Breeds ONLY

Owners must remain in shelter with their pet and provide kennel, food, water and bowls for them. Pets must be on a leash or in a kennel at all times and vaccination records are required.

#### CHERRY TREE HOUSE \* PETS NOT ALLOWED \*

Building 4415, 4th Avenue
